

Co-Packers (Qld) Pty. Ltd has two key business activities:-

- The manufacture of plastic, injection moulded and blow moulded “sample” paint pots & the subsequent tinting and filling of these pots with paint samples.
- The manufacture of a range plastic, injection moulded chairs and spacer wheels for the concrete piling industry.

The management of **Co-Packers (Qld) Pty. Ltd** place particular emphasis on the commitment and competency of its employees to continually improve all manufacturing and service delivery processes and on the expertise and reliability of its main suppliers.

Our quality management system demands effective and timely responses from our management team in order to achieve customer satisfaction.

Co-Packers (Qld) Pty. Ltd determines “Quality” by:-

- Monitoring of our own internal management systems and procedures through internal auditing.
- Regularly assessing our customer’s needs and expectations
- Analysing customer feedback

Initially the following quality objectives have been selected:-

- a) To fully understand the needs and expectations of our customers.
- b) To deliver products and services to our customers on time that meet the standards prescribed in relevant agreements or contracts.
- c) To instil a culture of “quality” throughout the company by providing appropriate training and development of our employees
- d) To ensure that our quality management system meets the requirements of ISO9001:2015 and that we comply with the statutory / legal requirements for managing risks associated with workplace health & safety.

We will regularly monitor the performance of the management systems by undertaking internal audits and by reviewing the progress made towards the implementation of individual quality objectives.

Over time we aim to improve the effectiveness of our quality management system and continue to grow our business.

The requirements of the International Standard ISO9001:2015 form the basis of the quality system that has been adopted by Co-Packers (Qld) Pty. Ltd

Dennis J. Mee
General Manager
